## Kalzip® Systems

Products and Applications

Karlovy Vary Airport Terminal, Czech Republic

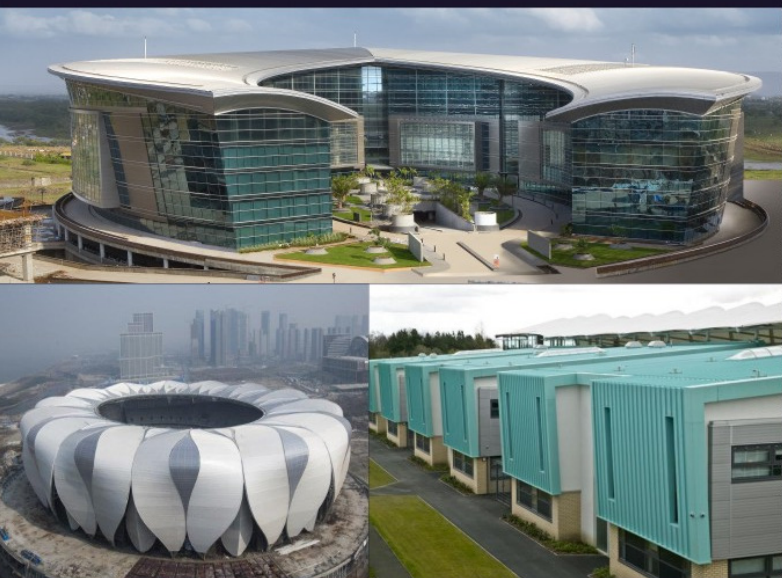

## Quality Lasts

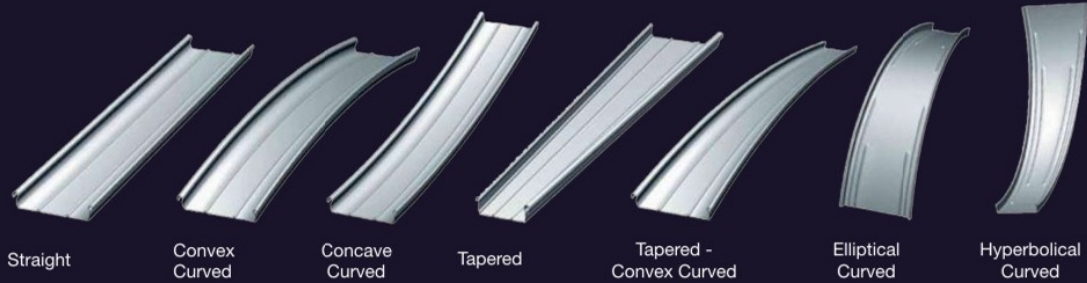

Kalzip - Building Systems

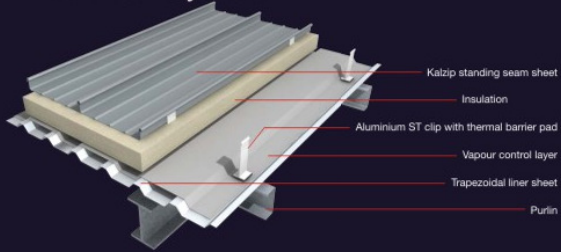

- Kalzip is an international company within Tata Steel Europe (formerly Corus).
- Kalzip was launched in 1968 with Nurnberg Congress hall (Germany) project.
- Over 100 million square meters of roofing and cladding installed worldwide till date.
- Kalzip combines international expertise with local services providing total solutions for the building envelope that are aesthetically pleasing long lasting architectural marvels tested and certified by the leading agencies of the world.
- Kalzip Asia Pacific has executed large & landmark projects encompassing commercial and infrastructure facilities including airports, metro stations, stadium, bus terminals & exhibition centers.
- Noteworthy projects include, Changi Airport Singapore, Nanjing Airport China along with various Olympic Stadiums, Delhi and Bangalore Airport, F1 Stadium, TCS, in India.

Kalzip® Systems

Liner Roof System

Kalzip - Nature Roof

Nature Roof - Nature Roof is a low maintenance, lightweight planted roof system that is made up of a standing seam. Kalzip roof fitted with drainage, substrate and plant layers.

- Kalzip Roof
- Recycled plastic drainage element.
- A layer of lightweight granular substrate formulated to the site and plant requirement
- Sedum Plugs
- Weather tight and water proof solution
- Improved thermal performance
- Reduced carbon dioxide levels
- Improved oxygen levels
- Improved air quality - fusion of dust and airborne particulate
- Reduced rainwater run-off

Kalzip - Building Systems

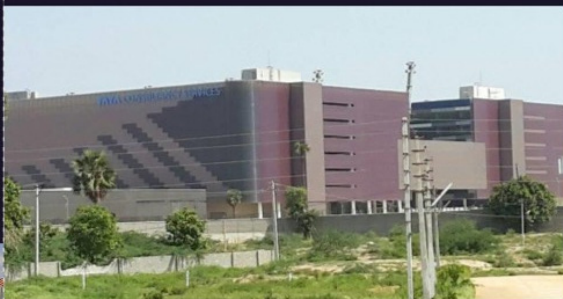

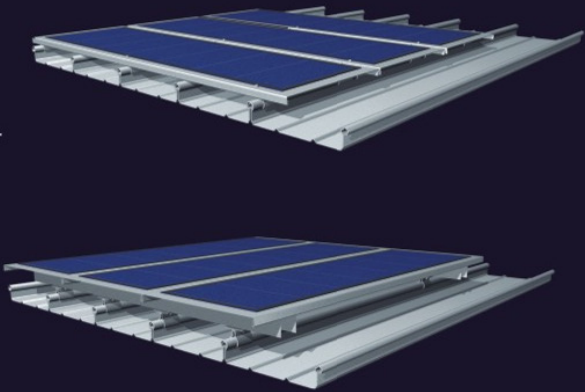

- Kalzip Building Systems include
- Kalzip standing seam roofing system
  - Nature roof
  - Facade solutions

- Kalzip Standing Seam Roofing System
- Kalzip aluminium coil profiled standing seam roofing solutions, chemically inert and non reactive
  - As strong as steel and lightweight, non corrosive
  - Kalzip non penetrative secret fix zip technology
  - All weather tight and longer life
  - Faster turnaround time, design flexibility, long length exceeding 100 m sheets to avoid overlaps
  - Kalzip tailor made solution with flexibility of meeting stringent thermal and acoustic requirements
  - LEED complied and recyclable. Kalzip system certified by leading agencies like BBA and Factory Mutual

Kalzip - Solar Clad

- Ideal photovoltaic solution which is roof integrated & which can be optimized for use in building envelopes.
- The solar modules can be fixed onto Kalzip standing seam roof either parallel, perpendicular or elevated without puncturing the roof.

Kalzip - Facade Solutions Plain or Perforated

- Façade solutions available in solid and perforated including KZ 65/400 standing seam, TF 800R, FC and W18/76 profiles
- Unique aesthetic design
- Lightweight
- Easy installation
- Long life expectancy ideal for refurbishment projects
- Perforated Facade System ideal for solar shading on transparent facades
- Sophisticated accentuation of facade
- Differentiates between public and semi public areas

Kalzip - Facade Panels
